This Prospectus is a transaction specific prospectus for an offer of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

Representations contained in this Prospectus are made taking into account that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters are publicly available information or may reasonably be expected to be known to investors and professional advisers whom prospective investors may consult.

Forward-looking statements

This Prospectus contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

The Company has no intention to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this Prospectus, except where required by law.

These forward-looking statements are subject to various risk factors that could cause the Company's actual results to differ materially from the results expressed or anticipated in these statements. These risk factors are set out in Section 5.

Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or

to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

For further information on overseas Shareholders please refer to Section 2.9.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX. Please refer to Section 6.2 for further details.

Target Market Determination

In accordance with the design and distribution obligations under the Corporations Act, the Company has determined the target market for the offer of New Options issued under this Prospectus. The Company and the Lead Manager will only distribute this Prospectus to those investors who fall within the target market determination (TMD) as set out on the Company's website (www.triggmining.com.au). By making an application under the Offer, you warrant that you have read and understood the TMD and that you fall within the target market set out in the TMD.

Company Website

No documents or other information available on the Company's website is incorporated into this Prospectus by reference.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would

contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

1.3 Key Risk Factors

Prospective investors should be aware that subscribing for Securities involves a number of risks and an investment in the Company should be considered as highly speculative. The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are set out in Section 5.

The predominant risks relating to the Company and the Offer are summarised below:

Risk	Description	Further Information
Nature of mineral exploration and exploitation	Possible future development of the Projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding.	Section 5.2(a)

Risk	Description	Further Information
	<p>If the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected geological formations, unexpected changes in the aquifers, flooding and extended interruptions top operations.</p> <p>No assurance can be given that the Company will achieve commercial viability through the exploration or development of its Projects.</p>	
Mineral Resource estimate	The Company's Mineral Resource estimates are made in accordance with the 2012 edition of the JORC Code and the Guidelines for Resource and Reserve Estimation for Brines adopted by JORC in April 2019. Mineral resources are estimates only. An estimate is an expression of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate.	Section 5.2(b)
Inability to abstract brine volume	The Company utilises specialist consultants to determine its ability to abstract brine from the aquifers, but there is a risk that the Company will be unable to abstract the brine at the predicted rates that are required to establish a full scale commercially viable operation. This can occur for a variety of reasons and as a result, pumping rates may be lower than expected, or require additional bores and/or trenches. Further, each bore has its own life expectancy which may be shorter than expected.	Section 5.2(c)
Variability in brine	Brine deposits may be variable due to the geological layering of the host rock, the location within the palaeodrainage system, inflows of other waters carrying other impurities or fresh water, all of which may affect the brine chemistry across the deposit. Additionally, there is the potential for dilution after rainfall which may cause changes in the brine recovery and this variability may cause different evaporation rates.	Section 5.2(d)
Inclement weather and natural	The Company's exploration activities are subject to a variety of risks and hazards	Section 5.2(e)

Risk	Description	Further Information
disasters	which are beyond its control, including hazardous weather conditions such as excessive rain, flooding and fires. Rainfall may also impact and cause dilution of the mineralisation in the brine samples.	
Climate change	There are a number of risks related to climate change which may affect the Company, including changes to the climate of the area in which the Projects are situated (which, if this results in reduced evaporation rates or increased rainfall, may adversely impact brine recovery and the ability to conduct fieldwork), changes in governmental policy in response to climate change and changes which impact on the agricultural industry and the demand for Sulphate of Potash (SOP).	Section 5.2(f)
Commodity price volatility	If the Company is successful in progressing to mineral production, revenue will derive from commodity sales which will expose the Company to commodity price and exchange rate risk.	Section 5.2(i)
New operational commodity and lack of experience	The exploration of potash products by way of brine exploration and evaluation is an emerging industry in Australia and there may be a lack of suitably trained professionals to conduct such activities. A failure to source, or a delay in sourcing, appropriately qualified professionals in Australia will likely have an adverse effect on the Company's ability to conduct its operations and on its financial position.	Section 5.2(k)
Additional requirements for capital	The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities.	Section 5.2(y)
COVID-19	The outbreak of the coronavirus disease (COVID-19) continues to impact global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.	Section 5.2(z)

Risk	Description	Further Information
Operational and technical	The operations of the Company will be subject to a number of factors which may include, amongst others: (i) failure to discover any economic mineral deposits; (ii) technical difficulties associated with the actual development and commercial extraction of the minerals; (iii) failure of the minerals extracted to achieve projected grades and recovery; (iv) adverse events outside the Company's control involving the environment or acts of force majeure; (v) increased competition within the industry for access to skilled personnel, equipment, contractors and/or consultants and raw materials in order to carry out the Company's activities; (vi) (if the Company is successful in progressing to mineral production) access to a viable transport solution to get product to market including access to infrastructure.	Section 5.3(b)
Results of studies	Subject to the results of exploration and evaluation programs to be undertaken, the Company intends to progressively undertake a number of studies in respect to the Projects, which may include scoping, prefeasibility and feasibility studies. There can be no guarantee that any of the studies will confirm the economic viability of the Projects or the results of other studies undertaken by the Company. Even if a study confirms the economic viability of the Projects, there can be no guarantee that the Projects will be successfully financed and brought into production as assumed or within the estimated parameters in the feasibility study once production commences. Further, the ability of the Company to complete a study may be dependent on the Company's ability to raise further funds to complete the study, if required.	Section 5.3(c)

Based on publicly available information as at the date of this Prospectus, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue are set out below:

Shareholder	Shares	%
Michael Ralston ¹	6,065,000	5.20

Note:

- Director Mike Ralston does not currently intend to take up his full Entitlement.

In the event all Entitlements are accepted there will be no change to the substantial holders on completion of the Offer.

1.6 Lead Manager

Mahe Capital Pty Ltd (AFSL 517246) (**Lead Manager**) has been appointed as the lead manager of the Offer. Terms of the lead manager mandate and total fees payable are set out in Section 6.4.2 below.

This Prospectus also includes the offer of up to 3,281,645 New Options to be issued to the Lead Manager (or its nominee) as part of the consideration for lead manager services provided by the Lead Manager to the Company in relation to the Offer (**Lead Manager Offer**). The New Options offered under the Lead Manager Offer will be issued on the terms and conditions set out in Section 4.2.

Only Mahe Capital Pty Ltd (or its nominee), may accept the Lead Manager Offer. A personalised Application Form in relation to the Lead Manager Offer will be issued to Mahe Capital Pty Ltd (or its nominee) together with a copy of this Prospectus.

1.7 Underwriting

The Offer is partially underwritten by Mahe Capital Pty Ltd (AFSL 517246) (**Underwriter**). Refer to Section 6.4.1 for details of the terms of the underwriting.

The Underwriter has also been appointed as the lead manager of the Offer. The terms of the lead manager appointment and total fees payable are set out in Section 6.4.2 below.

The Underwriter may appoint sub-underwriters to sub-underwrite the Offer.

No sub-underwriter will increase their shareholding to above 19.99% as a direct result of the issue of Securities under the Offer. Where Shares are issued pursuant to the exercise of New Options, the voting power of the sub-underwriters who exercise their New Options will increase. The likelihood of New Options being exercised is dependent on the price of Shares from time to time until the New Options expire.

1.8 Effect on Control

The Underwriter is presently not a Shareholder and is not a related party of the Company for the purposes of the Corporations Act. The issue of Shares under this Prospectus to the Underwriter may increase its interest in the Company and dilute the Shareholding of other Shareholders to the extent they elect not to participate in the Offer or are ineligible to participate in the Offer.

In accordance with the terms of the Underwriting Agreement, the Underwriter will allocate the Shortfall to its sub-underwriters and/or clients and people who have otherwise agreed to assist with the completion of the Offer such that neither the Underwriter, the sub-underwriters nor any of the Underwriter's clients, individually, will have a voting power in the Company in excess of 19.9% after the issue of the Shortfall.

The Company, in consultation with the Underwriter, will ensure that the Offer (including the equitable dispersion of any Shortfall Securities) complies with the provisions of Chapter 6 of the *Corporations Act 2001* (Cth) and is otherwise consistent with the policy guidelines contained in ASIC Regulatory Guide 6 and Takeovers Panel Guidance Note 17.

1.9 Potential dilution on non-participating Shareholders

In addition to potential control impacts set out in Section 1.8, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 27.28% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus) from the issue of Shares.

No immediate dilution will occur as a result of the issue of New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus are issued and exercised into Shares, Shareholders who do not participate in the Offer, are likely to be diluted by an aggregate of approximately 49.25% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

For illustrative purposes, the table below shows how the dilution may impact the holdings of Shareholders:

Holder	Holding as at Record date	% at Record Date	Entitlements under the Offer	Holdings if Offer not taken Up	% post Offer
Shareholder 1	1,000,000	0.86%	375,000	1,000,000	0.62%
Shareholder 2	500,000	0.43%	187,500	500,000	0.31%
Shareholder 3	150,000	0.13%	56,250	150,000	0.09%
Shareholder 4	50,000	0.04%	18,750	50,000	0.03%
Shareholder 5	25,000	0.02%	9,375	25,000	0.01%
TOTAL	1,725,000		646,875	1,725,000	

Notes:

1. Assuming the Full Subscription of \$3,281,645 is achieved under the Offer.
2. This is based on a share capital of 116,680,728 Shares as at the date of the Prospectus and assumes no Shares are issued prior to the Record Date including on exercise or conversion of securities on issue.
3. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Underwriting Agreement and Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.

2. DETAILS OF THE OFFER

2.1 The Offer

The Offer is being made as a pro-rata renounceable entitlement issue of three (3) new Shares for every eight (8) Shares held by Shareholders registered at the Record Date at an issue price of \$0.075 per Share together with one (1) New Option for every two (2) new Shares subscribed for and issued. Fractional entitlements will be rounded down to the nearest whole number.

2.3 Payment options

(a) By BPAY®

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. **It is your responsibility to ensure that funds submitted through BPAY® are received by 5:00 pm (WST) on the Closing Date. The Company shall not be responsible for any delay in the receipt of the BPAY® payment.**

Guidance where you have more than one CRN (Shareholding of Shares)

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking

up your Entitlement in respect of one of those Shareholdings only use the CRN specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. **Do not use the same CRN for more than one of your Shareholdings.** This can result in your application monies being applied to your Entitlement in respect of only one of your Shareholdings (with the result that any Application Form in respect of your remaining Shareholdings will not be valid).

(b) **By Electronic Funds Transfer (overseas applicants)**

For payment by Electronic Funds Transfer (**EFT**) for overseas Eligible Shareholders, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via EFT if you are the holder of an account that supports EFT transactions to an Australian bank account. Please note that should you choose to pay by EFT:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

2.4 Implications of an acceptance

Returning a completed Entitlement and Acceptance Form or paying any application monies by BPAY® or EFT will be taken to constitute a representation by you that:

- (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety; and
- (b) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any application monies, the application may not be varied or withdrawn except as required by law.

2.5 Minimum subscription

The minimum subscription in respect of the Offer is \$1,500,000, being the partially underwritten amount of the Offer.

No Securities will be issued until the minimum subscription has been received. If the minimum subscription is not achieved within 4 months after the date of issue of this Prospectus, the Company will either repay the application monies to the Applicants or issue a supplementary prospectus or replacement prospectus and allow Applicants one month to withdraw their application and be repaid their application monies.

2.6 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer (**Shortfall Securities**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.075 being the price at which Shares have been offered under the Offer.

If you do not wish to take up any part of your Entitlement you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Shareholders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Offer.

Eligible Shareholders who wish to subscribe for Securities above their Entitlement are invited to apply for Shortfall Securities under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form or by making payment for such Shortfall Securities in accordance with Section 2.3.

The Underwriter (in consultation with the Directors) will allocate Shortfall Securities pursuant to the Shortfall Offer with a view to:

- (a) recognising the ongoing support of existing Shareholders of the Company;
- (b) identifying new potential long-term or cornerstone investors; and
- (c) ensuring an appropriate Shareholder base for the Company.

The Directors reserve the right at their absolute discretion to reject any application for Shortfall Shares or to issue a lesser number of Shortfall Shares than that applied for, and it is an express term of the Shortfall Offer that applicants for Shortfall Shares will be bound to accept a lesser number of Shortfall Shares allocated to them than applied for. If a lesser number is allocated, excess application money will be refunded without interest as soon as practicable.

The Underwriter notes that no Securities will be issued to an applicant under this Prospectus or via the Shortfall Offer if the issue of Securities would contravene the takeover prohibition in section 606 of the Corporations Act. Similarly, no Securities will be issued via the Shortfall Offer to any related parties of the Company.

2.7 ASX listing

Application for Official Quotation of the Securities offered pursuant to this Prospectus will be made in accordance with the timetable set out at Section 1. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all application monies for the Shares within the time prescribed under the Corporations Act, without interest.

Application for Official Quotation of the New Options offered pursuant to this Prospectus will also be made in accordance with the timetable set out at Section 1.

The fact that ASX may grant Official Quotation to the Securities is not to be taken in any way as an indication of the merits of the Company or Securities now offered for subscription.

2.8 Issue of Securities

Securities issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and timetable set out at Section 1.

Securities issued pursuant to the Shortfall Offer will be issued on a progressive basis. Where the number of Securities issued is less than the number applied for, or where no issue is made surplus application monies will be refunded without any interest to the Applicant as soon as practicable after the closing date of the Shortfall Offer.

Pending the issue of the Securities or payment of refunds pursuant to this Prospectus, all application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Securities issued under the Offer will be mailed as soon as practicable after the issue of Securities and for Shortfall Securities issued under the Shortfall Offer as soon as practicable after their issue.

2.9 Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Securities these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Shares will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

New Zealand

The Securities are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the Offer of these Securities is being made in reliance on the transitional provisions of the Financial Markets Conduct Act 2013 (New Zealand) and the Financial Markets Conduct (Incidental Offers) Exemption Notice 2016 (New Zealand).

This Prospectus has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This document is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

Nominees and custodians

Nominees and custodians may not submit an Entitlement and Acceptance Form on behalf of any Shareholder resident outside Australia and New Zealand without the prior consent of the Company, taking into account relevant securities law restrictions. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

2.10 Appointment of Nominee

Pursuant to ASX Listing Rule 7.7, the Company has appointed a nominee, Mahe Capital Pty Ltd (AFSL 517246), to sell the Entitlements to which Ineligible Shareholders are entitled. The nominee will have the absolute and sole discretion to determine the timing and price at which the Entitlements may be sold and the manner of any such sale.

The proceeds of the sale of these Entitlements will firstly be applied against expenses of such sale, including brokerage, and any balance will accrue to the relevant Ineligible Shareholders as described below.

The net proceeds of the sale of these Entitlements will then be forwarded by the Company as soon as practicable to the Ineligible Shareholders, in proportion to their share of such Entitlements (after deducting brokerage commission and other expenses). If any such net proceeds of sale are less than the reasonable costs that would be incurred by the Company for distributing those proceeds, such proceeds may be retained by the Company.

Notwithstanding that the nominee must sell Entitlements, Ineligible Shareholders may nevertheless receive no net proceeds if the costs of the sale are greater than the sale proceeds. In this regard, the nominee will not be required to sell Ineligible Shareholders' Entitlements at a particular price.

Shareholders resident in Australia or New Zealand holding Securities on behalf of persons who are resident overseas are responsible for ensuring that taking up an Entitlement under the Offer does not breach regulations in the relevant overseas jurisdiction. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

4. RIGHTS AND LIABILITIES ATTACHING TO SECURITIES

4.1 Rights and liabilities attaching to Shares

The following is a summary of the more significant rights and liabilities attaching to the Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) Dividend rights

Subject to and in accordance with the Corporations Act, the Listing Rules, the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

Subject to the rights of Shareholders entitled to Shares with special rights in a winding-up and the Corporations Act, all monies and property to be distributed among Shareholders on a winding-up shall be distributed in proportion to the Shares held by them, irrespective of the amount paid-up or credited as paid up on the Shares.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the

holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

- (iii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the New Options.

If a notice delivered under (g)(ii) for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, the Company must, no later than 20 Business Days after becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors.

(l) **Transferability**

The New Options are transferable subject to any restriction or escrow arrangements imposed by ASX or under applicable Australian securities laws.

5. RISK FACTORS

5.1 Introduction

The Securities offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors consider the risk factors set out in this Section 5, together with all other information contained in this Prospectus.

The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 5, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities. This Section 5 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

5.2 Company specific

(a) Nature of mineral exploration and exploitation

Possible future development of the Projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.

If the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected geological formations, unexpected changes in the aquifers, flooding and extended interruptions due to inclement or hazardous weather conditions, fires, explosions or accidents.

No assurance can be given that the Company will achieve commercial viability through the exploration or development of its Projects. The success of the Company will also depend upon the Company having access to sufficient capital to develop its assets, including its ability to maintain Tenements and obtain all required approvals for its activities. In the event the various exploration programs prove to be unsuccessful this could lead to a diminution in the value of the Tenements which in turn would have an adverse impact on the value of the Shares, a reduction in the cash reserves of the Company and possible relinquishment of the Tenements.

(b) **Mineral Resource estimate**

The Company's Mineral Resource estimates are made in accordance with the 2012 edition of the JORC Code and the Guidelines for Resource and Reserve Estimation for Brines adopted by JORC in April 2019 Mineral resources are estimates only. An estimate is an expression of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

(c) **Inability to abstract brine volume**

The Company has utilised specialist consultants in determining its ability to abstract brine from the aquifers, but there is a risk that the Company will be unable to abstract the brine at the predicted rates that are required to establish a full scale commercially viable operation. This can occur due to low permeability of aquifer material, variability in the mineralisation and continuity of the various aquifer layers. As a result, pumping rates may be lower than expected, or require additional bores and/or trenches. Each bore is likely to have a specific life expectancy and will eventually run dry as the brine is extracted. This life expectancy may be variable and shorter than expected.

(d) **Variability in brine**

Brine deposits may be variable due to the geological layering of the host rock, the location within the palaeo-drainage system, inflows of other waters carrying other impurities or fresh water, all of which may affect the brine chemistry across the deposit. Added to this, there is also the potential for dilution after rainfall which may influence changes in the chemistry of brine recovery. These variability factors may cause different evaporation rates, alternative salt evaporites being formed in the evaporation ponds and require additional pumping volumes due to lower grades.

(e) **Inclement weather and natural disasters**

The Company's exploration activities are subject to a variety of risks and hazards which are beyond its control, including hazardous weather conditions such as excessive rain, flooding and fires. Severe storms and high rainfall leading to flooding and associated damage may result in

disruption to exploration activities including field work, evaporation trials, scouring damage to trenches and roadways. Rainfall may also impact and cause dilution of the mineralisation and/variability in the brine deposit.

(f) **Climate change**

There are a number of risks related to climate change which may affect the Company, including:

- (i) the changes which may occur to the climate of the area in which the Projects are situated are not able to be predicted. The climate may change in a way which, for example, reduces evaporation rates or increases rainfall or the intensity of weather events in the Tenement areas. These may have an adverse effect on brine recovery and/or cause disruption to field work and exploration activities;
- (ii) changes in governmental policy in response to climate change could adversely impact the value of the Company's assets, its business strategy and/or the costs of its operations; and
- (iii) climate change may have an impact on the operations of participants in the agricultural industry (being the users of SOP), which may lead to reduced demand for SOP.

(g) **Title risk**

The Company operates over 12 granted exploration licences (**Tenements**) which permit the Company to undertake exploration. Each Tenement carries with it annual expenditure and reporting commitments, as well as other compliance conditions. Consequently, the Company could lose title or its interest in a Tenement if the conditions are not met or if there are insufficient funds available to meet expenditure commitments. These exploration tenements are subject to periodic renewal. The renewal of the term of a granted tenement is also subject to the discretion of the relevant Minister. Various conditions may also be imposed as a condition of renewal. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of part of the tenement areas comprising the Company's Projects. The Company makes no assurance that the renewal applications will be granted or applications approved.

(h) **Exploitation, exploration and mining licences**

In the event the Company successfully delineates economic deposits on any Tenement, it will need to apply for a mining lease to undertake development and mining on the relevant Tenement. There is no guarantee that the Company will be granted a mining lease if one is applied for and if a mining lease is granted, it will also be subject to conditions which must be met.

(i) **Commodity price volatility**

If the Company achieves success leading to mineral production, the revenue of the Company will be derived from the sale of commodities which will expose the Company to commodity price and exchange rate risk. Commodity prices fluctuate and are affected by numerous

factors beyond the control of the Company. Such factors include (but are not limited to) the supply and demand for commodities such as SOP, forward selling activities, technological advancements and other macroeconomic factors that may affect either commodity prices or exchange rates.

(j) **Statutory approvals**

The Company's Projects and operations are subject to Commonwealth and State laws, regulations and specific conditions regarding tenure approvals to explore, construct and operate. There is a risk that such laws, regulations and specific conditions may impact on planned exploration activities and any future permitting required for project development. Key approvals from the Environmental Protection Authority (EPA), Department of Mines, Industry Regulation and Safety (DMIRS), Department of Water (DoW) and any other applicable agency may take longer to be obtained or may not be obtainable at all. The Company has identified that exploration activities may create disturbances associated with exploration drilling, pump testing and trial evaporation ponds during the exploration phase of the project evaluation.

(k) **New operational commodity and lack of experience**

The exploration of potash products by way of brine exploration and evaluation is an emerging industry in Australia. As a consequence, there may be a lack of suitably trained professionals within the Australian market to conduct such activities. A failure to source, or a delay in sourcing, appropriately qualified professionals will be likely to have an adverse effect on the Company's ability to conduct its operations and on its financial position.

(l) **Failure to secure native title agreement for mining of Lake Throssell**

The Company has in place a native title exploration agreement in respect of exploration licence E38/3065 (forming part of the Lake Throssell Potash Project). However, the Company will be required to negotiate and execute a formal agreement to enable production to occur at its Lake Throssell Potash Project. The completion of this process may have impacts on timing of development activities at the Project or may not be achieved which may result in the tenement not being able to be mined.

(m) **Changes in regulations**

Adverse changes in Federal or State government policies or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations and/or the mining and exploration activities of the Company. It is possible that the current system of exploration and mine permitting in Western Australia may change resulting in impairment of rights and possibly expropriation of the Company's properties without adequate compensation.

(n) **Commercial risks of mineral exploration and extraction**

The Tenements are at various stages of exploration and potential investors should understand that mineral exploration and development is a high-risk undertaking. There can be no assurance that exploration of

the Tenements, or any other tenements that may be acquired in the future, will result in the discovery of any economic deposits. Even if the Company identifies a deposit at the Laverton Links or Lake Throssell Potash Projects, or elsewhere, there is no guarantee that the mineral deposit can be economically exploited.

(o) **Currency volatility**

International prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are set in Australian dollars, consequently exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined by international markets.

(p) **Dependence on key personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on efforts of senior management and its key personnel. There can be no assurance that there will be no detrimental impact on the Company if one or more of these employees cease their employment. The loss of key employees could cause a significant disruption to the Company and could adversely affect its operations.

(q) **New projects and acquisitions**

The Company may make further acquisitions as part of future growth plans. In addition to the current Tenements the Company may evaluate and acquire other interests in new potash projects by way of acquisition or investment. The Directors of the Company will use their expertise and experience in the resource sector to assess the value of any new potential projects that have characteristics that are likely to provide returns to Shareholders. There can be no guarantee that any new acquisition or investment will eventuate from these pursuits, or that any acquisition will result in a return for Shareholders. Such acquisitions or investment may result in use of the Company's cash resources and/or issuances of equity securities, which might involve substantial dilution to some or all of the Shareholders.

(r) **Environmental risk**

The operations and proposed activities of the Company are subject to Federal and State laws and regulations concerning the environment. As with most exploration projects, the Company's activities, including the Projects, are expected to have an impact on the environment. It is the Company's intention to conduct its activities to the required standard of environmental obligation, including compliance with all environmental laws. Although the Company believes that it is in compliance in all material respects with all applicable environmental laws and regulations, there are certain risks inherent to its activities, such as accidents or other unforeseen circumstances, which may subject the Company to future liability.

(s) **Insurance**

The Company insures its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance

may not be available or of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered, or fully covered, by insurance could have a material adverse effect on the business, financial condition and/or results of the Company. In addition, there is a risk that an insurer defaults in the payment of a legitimate claim by the Company.

(f) **Contractual disputes**

As with any contract, there is a risk that the Company's contracts could be disputed in situations where there is a disagreement or dispute in relation to a term of the contract. Should such disagreement or dispute occur, this may have an adverse impact on the Company's operations and performance generally. It is not possible for the Company to predict or protect itself against all such risks.

(u) **Third party risk**

The operations of the Company require the involvement of a number of third parties, including suppliers, contractors and clients. Financial or operational failure, default or contractual noncompliance on the part of any such third parties may have a material impact on the Company's operations and performance. It is not possible for the Company to predict or protect the Company against all such risks.

(v) **Competition**

Although there is currently no Australian production of SOP, there are other mining exploration companies in Australia that are currently seeking to explore, develop and produce SOP. The Company will have no influence or control over the activities or actions of its competitors and other industry participants, whose activities or actions may positively or negatively affect the operating and financial performance of the Company's projects and business. Competitors may have significant additional experience and/or resources to explore, develop and produce competing products, which may adversely affect the Company's financial position or prospects.

(w) **Limited history**

The Company was incorporated on 26 February 2014 and commenced exploration activities in 2017 and therefore has limited operating history and limited historical financial performance. No assurance can be given that the Company will achieve commercial viability through the successful exploration and/or mining of the Projects. Until the Company is able to realise value from its Projects, it is likely to incur ongoing operating losses.

(x) **Potential for dilution**

Upon implementation of the Offer and the Lead Manager Offer, assuming all Entitlements are accepted, no Shares are issued prior to the Record Date including on exercise or conversion of securities on issue, the number of Shares in the Company will increase from 116,680,728 currently on issue to 160,436,001 and the number of Options in the Company will increase from 39,934,388 to 65,093,670. This means that immediately after the Offer each Share will represent a significantly lower proportion of the ownership of the Company.

Further if the New Options are subsequently exercised and Shares are issued on exercise of those New Options, each Share will represent a significantly lower proportion of the ownership of the Company.

It is not possible to predict what the value of the Company, a Share or an Option will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.

The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.105 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offer.

(y) **Additional requirements for capital**

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

(z) **Coronavirus (COVID-19)**

The outbreak of the coronavirus disease (**COVID-19**) continues to impact global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.

The Company has implemented a range of strategies to mitigate the risks posed by COVID-19 including State and Federal Government travel restrictions. The Board regularly assesses the latest State and Federal Government updates in relation to the COVID-19 pandemic and implements and adjusts measures as necessary. The Company is firmly committed to protecting the vulnerable Traditional Owners from COVID-19 and will ensure in-field exploration activities are carried out with their consent and in compliance with State and Federal Government travel restrictions.

The COVID-19 pandemic also creates significant uncertainty and additional risk to the Company for planning of work programs and forecasting expenditures. In addition, the effects of COVID-19 on the Company's Share price and global financial markets generally may also affect the Company's ability to raise equity or debt or require the Company to issue capital at a discount, which may in turn cause dilution to Shareholders or the COVID-19 pandemic may also give rise to issues, delays or restrictions in relation to land access and the Company's ability to freely move people and equipment to and from exploration projects may cause delays or cost increases. The effects of

COVID -19 on the Company's Share price and global financial markets generally may also affect the Company's ability to raise equity or debt or require the Company to issue capital at a discount, which may in turn cause dilution to Shareholders.

The Directors continue to monitor the situation and consider the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to the impact of COVID-19 on its work programs and any adverse impact on the Company. If any of these impacts appear material prior to close of the Offer, the Company will notify investors under a supplementary prospectus.

5.3 Industry specific

(a) Geological, exploration and development

The exploration, development and mining of mineral resources is a high risk, high-cost exercise with no guarantee of success. These activities take place over an extended period of time and are often subject to increases, often material, in the costs and timing associated with these activities. Factors beyond the control of the Company may result in the Company's failure to find and/or to be able to economically develop any mineral projects and therefore there is no guarantee as to the financial success of any such activities.

(b) Operational and technical

The operations of the Company will be subject to a number of factors which may include, amongst others:

- (i) failure to discover any economic mineral deposits;
- (ii) technical difficulties associated with the actual development and mining of the minerals;
- (iii) failure of the minerals mined to achieve projected grades and recoveries;
- (iv) technical difficulties associated with the processing and recovery of the minerals from the abstracted brine and the production of a saleable product;
- (v) adverse events outside the Company's control involving the environment or acts of force majeure;
- (vi) increased competition within the industry for access to skilled personnel, equipment, contractors and/or consultants and raw materials in order to carry out the Company's activities; and
- (vii) a viable transport solution to get product to market including access to infrastructure.

(c) **Results of studies**

Subject to the results of exploration and evaluation programs to be undertaken, the Company intends to progressively undertake a number of studies in respect to the Projects. These studies may include scoping, prefeasibility and feasibility studies. These studies will be completed within parameters designed to determine the economic feasibility of the Projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Projects or the results of other studies undertaken by the Company (e.g. the results of a feasibility study may materially differ to the results of a scoping study). Even if a study confirms the economic viability of the Projects, there can be no guarantee that any Project will be successfully brought into production as assumed or within the estimated parameters in the feasibility study (e.g. operational costs and commodity prices) once production commences. Further, the ability of the Company to complete a study may be dependent on the Company's ability to raise further funds to complete the study, if required.

5.4 General risks

(a) **Economic**

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

(b) **Market conditions**

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

In addition, the extent of the effects of COVID-19 is at this stage uncertain and continuing to evolve. The COVID-19 pandemic is having, and is expected to continue to have, a significant influence on the volatility of equity markets generally and may continue to impact and influence the value of the Company's quoted securities.

(c) **Litigation risks**

The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.

(d) **Dividends**

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(e) **Taxation**

The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.

(f) **Reliance on key personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(g) **Cyber risk**

The Company's operations are and will continue to be reliant on various computer systems, data repositories and interfaces with networks and other systems. Failures or breaches of these systems (including by way of virus and hacking attacks) have the potential to materially and negatively impact the Company's operations. Whilst the Company has barriers, continuity plans and risk management systems in place, there are inherent limits to such plans and systems. Further, the Company has no control over the cyber security plans and systems of third parties with which it may interface or upon whose services the Company's operations are reliant.

5.5 Speculative investment

The risk factors described above, and other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities.

Prospective investors should consider that an investment in the Company is highly speculative.

There is no guarantee that the Securities offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Securities.

Before deciding whether to subscribe for Securities under this Prospectus you should read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.
